VULCAN, ALBERTA

LOCAL NEWS ITEMS

Hotel Royal, near C. P. R. station, on main street, Vulcan, rates 50c, 75c, \$1. Mrs. Paul Wittcock has returned home to Vulcan after an extended visit to the city of Portland.

Born, at Mrs. Speers' hospital in Vulcan, on August 24th, 1927, to Mr. and Mrs. Jacob Ramor, a daughter.

The next meeting of Vulcan Women's Institute, the first since vacation time, will be held on Friday, September 2nd.

Born, at Mrs. Speers' hospital in Vulcan, on August 24th, 1927, to Mr. and Mrs. John Lucas, of Reid Hill district, a son.

Bran and Shorts, for sale in quantities to suit purchasers, at bargain prices, at the new Parish & Heimbecker elevator, which is in charge of Mr. C. Wallace.

Mr. Alf Bell, who was one of the active boys about town until he left some time ago for B. C., was in Vulcan this week when on his way to Toronto.

Dr. Barker and Mrs. Barker are giving a complimentary community dance, at the Odd Fellows' hall, this Friday evening. A cordial invitation is extended to everybody.

Rev. W. S. Brooker, pastor of Tuxedo United Church, Calgary, will conduct the morning and evening services at the Vulcan United Church on Sunday next, September 28th.

The Buck & Howson store front is being touched up with paint to give conspicuousness to the signs and maintain the attractiveness of these splendid store premises.

Mr. Len Davis, and his orchestra, the Arcadians, will return to Vulcan the first of the month, and are already booked for a dance at the Odd Fellows' hall, on Friday night, September 9th.

Anglican services on Sunday, August 28th, at St. Andrew's Church: Sunday school 10 a. m., matins 11 a. m., evening song 7:30 p. m. There will be a service at Union Jack school at 3:30 p. m., conducted by Rev. D. F. Kemp.

LOCAL NEWS ITEMS

The ladies of Redlandview Women's Institute entertained the ladies of the neighboring branches, Eastway, Brant, Thigh Hill and Vulcan, to a social afternoon on August 23rd, at the Red Cross schoolhouse. A short program of music, singing and recitations was rendered, and much enjoyed by the visitors. Following the program, lunch was served, and altogether a very pleasant afternoon was spent. The next meeting of the Redlandview Institute will be held at the home of Mrs. Robert Mitchell on September 7th, when as many of the members as possible are requested to be present.

The several recent changes in connection with the elevators have divulged an incident of interest. Mr. Miller White made the first delivery of grain to the Terwilliger grain elevator when that place opened for business in 1912, and also made the last delivery to the same elevator just previous to its recent passing to new ownership. Mr. White gives the information that he has continuously marketed his grain at this house since the commencement of the period which has produced the unique record which is here described. Coincidence with the publishing of this little story is the visit to Vulcan of Mr. George Terwilliger, a former partner in the elevator enterprises, who comes here to inspect the land and crop interests which are still his in this district.

There was a football match here on Wednesday evening which was another demonstration that it takes just about the best team in the province to beat the Vulcan eleven. The engagement was with the Maple Leafs of Lethbridge and the first for the locals since their game in the championship semi-finals with the Callies at Calgary. The visitors came by auto and their arrival was delayed by rain on the way, and on this account the game was shortened to half-hour periods. Vulcan lined-out their regular team, and the play showed an edge in their favor, but this was not definitely marked until the second half, when Vulcan scored three goals, Andy Hetherington getting them all, the result of splendid and unselfish team play, the kind that wins games. The Leafs possess some fine talent and were certainly a factor in producing a game which was great entertainment for an assembly of spectators which was large considering the circumstances. Vulcan is booked to go to Lethbridge next week for the return game, which will perhaps be their last for the season, and players and fans are ambitious that they complete the year with the success that has been theirs thus far.

The papers still are running photos and articles on the Vulcan cyclone of some weeks ago. Mrs. Chester Wallace this week brought to The Advocate office a copy of the Kansas City Star which printed a very large illustration of our now famous twister. It was sent by friends who wrote to enquire of the safety of relatives here, the reports exaggerating to the extent that the town had been totally wiped out. Seeing the pictures of the cyclone would make it difficult for one to believe that there was no loss of life, and not even an injury to any one.

LOCAL NEWS ITEMS

The fellow who is content with little usually gets less.

Born, in the hospital at Vulcan, on August 20th, 1927, to Mr. and Mrs. Jack Deans, of Vulcan, a son.

The material for the new Christian Church will arrive the first of the coming week, and work on it will begin at once.

The telephone system in Alberta showed a loss of 19 stations during July. Rurals gained 41 but the exchange phones recorded a loss of 66.

Two others of the graduates of the Vulcan schools, who have attained to the status of teachers and have secured schools in the district, are Miss Pearl Fulton, who will teach at Cottonwood, and Mr. Dave Smith, who will teach at Peace. These, with the others of our boys and girls who have entered the teaching profession, will share in the good wishes of an interested people.

The elevator on the west end of the "big eight" now at Vulcan has recently passed to the ownership of The Independent Grain Company, Limited, a company new to the grain farmers at this particular point, but well known in the trade throughout the province. The Independent at Vulcan will be under the management of Mr. Clifford Todd, well and favorably known throughout the district.

The local paper for the local merchant is the best and cheapest method extant to make the services he can render known to the buying public. At a cost of from a dollar a week up to say an average of five dollars a week, he may obtain publicity that would cost him twice, three, and in some cases ten times that amount by other methods. There is no postage, no distribution. All he has to do is to supply the copy.

Once every year the management of the Vulcan theatre contributes two nights of pictures and entertainment in support of the Vulcan and district school fair, and for this year next Monday and Tuesday will be given to this purpose. Particularly suitable pictures are selected for the occasion, and this one will be "His People," said to be of the kind and as good as the memorable production, "Oven the Hill." This is an opportunity for fine entertainment and a boost for a good thing.

A definition of patriotism contained in an extract from a dialogue in a novel called "Hounds of Spring" is worthy of reproduction. One of the speakers protests: "But you cannot abolish patriotism; it is something fundamental like the love of one's children." The reply was: "I don't want to. But real love of your children is not greedy and scheming and resentful and jealous of good in other people's children. There is nothing new or beautiful in national egotism and greed and delugate scorn and patronage of other nations."

Misses Beulah Walker and Marian Lebeau, whose eminent success in music and art has given them and the town of Vulcan a place of prominence many times in the press and elsewhere, have announced a joint recital to be given in the theatre on Thursday night. These talented artists are truly Vulcan girls whom the citizens with appreciation will no doubt be delighted to honor, and The Advocate predicts for them a real reception. The program which they will present will be varied to the extent of their wide accomplishments, and should provide entertainment of the most pleasing kind.

Several have been the animal stories told by our citizens who have seen on tour, and this one comes from Armand Elvies, who has just been on a trip through the mountains, while driving on the Windermere trail a big moose bounded from the woods and came within a span of colliding with their car and in making a tremendous get-away took several jumps alongside of the car close enough to be touched. It was a thrill, no doubt, to tourists and moose. At another point on the road they met in with a bear, which was a tame fellow, who ate fruit and cake from their hands, and permitted one of the girls of the party to embrace him while a photo was taken. These are but a couple of incidents of a trip filled with interest.

Vulcan friends are this week extending felicitations to Mr. and Mrs. Dr. Barker, well known citizens of town, who were on Friday, August 19th, the principles in a marriage which took place at Victoria United Church parsonage, Calgary. Rev. Dr. W. A. Lewis officiating. The only attendant was Mr. Norman A. Barker, brother of the groom. Dr. Barker, has for several years been a practicing dentist in Vulcan, connected with the several associations of the town and giving support to its enterprises, and is widely known in the district. The bride, who has a wide circle of friends, is best known as a successful principal of the Vulcan schools. She is a daughter of the late Mr. and Mrs. Charles Pickard, of Saskatoon, N.B., and a niece of the late Dr. Humphrey Pickard, first president of Mount Allison University, where she graduated with a bachelor's degree in arts in 1919. It is a satisfaction to fellow residents that Dr. and Mrs. Barker will continue to reside in Vulcan, and The Advocate joins the many who are wishing them well.

LOCAL NEWS ITEMS

Friends are all you have to keep you from being a stranger.

The painting of the premises of the Pettman pool parlor has been completed, and the change is conspicuous.

Miss Grace Hart, who has for the past three weeks been visiting here with her sister, Mrs. George McMan, left last week for her home in Red Deer.

Dr. G. D. Stanley, Dr. Gibson and S. S. Savage of the Calgary Elks' Lodge left today for Hamilton to attend the Dominion meeting of the B. P. O. E.

Foster predicted a storm on or about August 17 and fine weather afterward. The storm came all right and we hope the fine weather comes, too. Should it happen so, then we will agree that Foster is a prophet.

Here is one contributed by Barber Pettman: "Why do you use rubber gloves when cutting hair?" asked the customer. "For the purpose of keeping our celebrated hair restorer from causing hair to grow on my hands," replied the barber. He sold a wicker.

Not much has been said recently in these columns of the Vulcan flour mill, but the mill goes on grinding away. Just by chance the news man was informed of an order for a carload of Vulcan flour for quick delivery to Calgary.

The Vulcan bakery is now mixing dough by machinery operated by electricity. The new mixer arrived some time ago, but a section of the machine was broken in unloading, and the use of the modern equipment was deferred for a time.

Mr. Dick of Calgary is negotiating with the town of Clareholm for the erection of a \$35,000 steam laundry on lot supplied by the town in subpart of that town. The report is current that another such building will be erected at Nanton by the same party.

Mrs. S. E. Van Fleet, and daughters, Misses Rachel and Ida, from Minot, North Dakota, are visiting with Mr. and Mrs. Porter Noyes, at their farm home east of Vulcan. Mrs. Van Fleet is a sister of Mr. Noyes. The Advocate was pleased to have a call from the Dakota visitors.

It would appear that Vulcan just can't escape the sending of appendicitis patients to hospital at Calgary and to the record this week is added the name of Mr. Harold Buck. The operation has been performed, and it is a fine satisfaction to report the patient doing just as well as possible.

Mr. Arthur Pierson, treasurer of The Independent Grain Company, was in Vulcan this week in connection with the business of his company, which has recently made the purchase of an elevator at Vulcan. Mr. Pierson was a caller at The Advocate office and placed an announcement for his firm in the advertising columns of this journal.

Flying Officer Shields, who made a non-stop flight from Winnipeg to High River, last week, spent a week in High River, returning this morning flying a Duff Daland aircraft, enroute to Winnipeg. Flying Officer Shields was stationed at High River, England, in 1924 and on the occasion of the visit of Canadian newspapermen at Renney, the writer had the privilege of flying with him and viewing the beauties of Kenley and surrounding country from an elevation of 1000 feet in an airplane provided by the air ministry.

The opening of a new filling station at Calgary on Wednesday was deemed of sufficient importance to secure an illustration and a big write-up in the city dailies. In this Vulcan will have a particular interest, for this station is the first to be put in operation by the Regal Oil and Refinery Company, and in this company the Vulcan Oils Limited has a financial interest. And that Vulcan many times figures in a big way in the big things is again demonstrated by the fact that Mr. A. G. Spooner is the president of the new Regal Oil and Refining Company, and Mr. A. J. Flood is a member of the board of directors. The refinery is located in south Calgary, and has a capacity at present of 700 barrels per day and later it will be increased to 1000 barrels. The process being used is the latest discovery in the rapidly advancing systems of oil refining.

The usual electric storm which seems to occur at the same hour the same day, Saturday, occurred on Saturday evening last and for a period of about two hours, half of High River and half of all the towns east as far as Vulcan were on half voltage, with the other half enjoyed good service. This was occasioned by a disconnecting switch at High River sub station being put out of commission by lightning. In this instance, the lightning hit the Blackie line near G. V. Wright's farm which affected High River and necessitated replacement of fuses at the High River sub station. This is the first time that lightning hitting the Blackie line has affected the High River distribution system. The management regret this unavoidable occurrence and the consequent disappointment of their customers. Times.

There was a near catastrophe on Saturday night, and as it was it was bad enough. Mr. Frank Boyer, who recently commenced the operation of a hot-dog counter on Saturday was the sufferer and the loser. The flaming medium was a gasoline lamp, which went wrong, and suddenly the small enclosure was ablaze with burning gas. Mr. Boyer grasped the lamp and threw it to the street, but this was not accomplished without the scorching of his face and a pair of badly burned hands. The injuries and the circumstances of the event were quite sufficient to prompt the contemplation of just what might have been. All is perhaps well that ends well, and when the hands are healed sufficiently the business will be resumed in a new location with a better outfit and equipped with electric lights and electric roaster.

LOCAL NEWS ITEMS

Most of us think we could do much better if we only had the opportunities which we don't realize we have.

Postmaster Elves has returned to Vulcan after a month spent on an auto tour to the coast cities and elsewhere.

Miss Norma Holmes, of Vulcan, has secured a place on the staff of the Camrose schools, and will teach History Latin and French.

Mr. Walter Crowe succeeds Mr. Wilford Lutes on the staff of the local branch of the Canadian Bank of Commerce, the latter having been transferred to St. Paul, Minn.

Rev. J. W. Jenkins will preach at Kirkcaldy, Sunday, August 28th, at 12 o'clock, and at Vulcan in the Odd Fellows' hall, at 7:30 p. m. All are cordially invited to attend.

Ticket holders in Vulcan were not lucky in the drawing for a car, conducted last week in Calgary by the Order of Railway Conductors. However, they figure that their several two-bits were spent in a good cause.

The picture theatre is being painted within and without, and the improvement is at once apparent. The theatre will next week introduce the fall and winter program, showing four nights a week. Many excellent pictures have been booked for the season.

The residence property in Vulcan, owned by Mr. Charles Hobbs, was one week sold to Mr. William McMan. The family of the new owner will shortly occupy the premises. Mr. McMan will continue to operate his farm some few miles from town.

There were recently a couple of slight interruptions in the electric light and power service, the cause of which given in technical terms perhaps would be understood only by a few. These little kinks are incidental to a new installation, but when everything gets tuned-up correctly the trouble will be over. As it was, the inconvenience was not great.

Master Bob Munro is going about with a badly swelled arm in a sling, the result of a mishap such as often occurs in the life of a live lad. The injured arm was X-rayed at the municipal hospital in High River, and the service was highly satisfactory. Bobbie was perhaps the first patient to this particular hospital for just such a service.

Mr. Harry Moss, who farms out, north of town, is just now entertaining his parents, Mr. and Mrs. David Moss, who are residents of Oakdale, California. The elder gentleman is eighty years of age, and an illness last winter necessitated a trip to the son to California, but his return to health has been sufficient to make a visit to Alberta a real pleasure and a benefit.

There was an auto collision the other day on the street nearly opposite The Advocate office. Mrs. John Jensen was driving up street in a classy new car when a man from Milo backed a truck out from in front of the hotel. They hit with a crash but luckily without injury to any person. The car was somewhat damaged and the fixing up will cost a bit, the expense of which was amicably settled by those interested. But the incident suggests the necessity of care in driving cars.

Vulcan schools will re-open on Monday, September 5th. This date is Labor Day, but not a holiday with the schools in Vulcan. The teaching staff will be composed of Mr. M. E. McGregor, principal, and Misses E. Davis, Kate Smith, Minnie Thomas, Adelaide Cook, Christina McKeller and Lucy Fair. The new member of the staff are Mr. MacGregor and Miss Holmes. The schools re-open following a term of particularly fine success, and the new teachers come with a like record of success, giving to the fall term here an auspicious start.

Mr. Willard Lutes, previous to his recent removal from Vulcan, was the recipient of a lounging robe and pair of slippers, the gift of the girls of the basketball team, and the presentation was made at a party in his honor at the home of Miss Kitty Purdy. Mr. Lutes has for some time been retiring the training and play of the basketball team, and to him the players ascribe much of the credit for the splendid record which has been established this season by the club. The sentiment which prompted the gift will have the endorsement of the many who appreciate the advantage of having in town an organization which has added so much to the name and fame of Vulcan.

Some six years ago Mr. Duncan McPherson was a resident of Vulcan, employed as a blacksmith with T. B. Lobeau. Recently friends here have received a copy of the program of the commencement exercises of the Kansas City Baptist Theological Seminary, and in it Mr. McPherson is named as a candidate for the degree of Bachelor of Theology, and at the graduating exercises he was on the program for an address, "The Ministry of Music in the Church." A clipping from a local paper reads: "The Rev. D. McPherson, pastor of the Baptist Church of Fall City, recently graduated from the Kansas City Baptist Theological Seminary. He had the distinguished honor of winning the highest grade scholarship maintained throughout the entire course. He was also the only name in the class which was placed on the honor roll in the Hebrew course. He is also having great success as teacher of the men's Bible class, a cut of which is shown in this issue." The picture is that of the entire class, with the accompanying article describes as having been organized just before Christmas with an attendance of twelve and on Easter morning the roll-call was answered by four more than the hundred. The success of former Vulcan residents is always of interest to readers of this great weekly record of events.

McLaughlin-Buick took vibration out of the engine—Now it has taken it out of the road

WHEN McLaughlin-Buick made its famous six-cylinder, Valve-in-Head engine vibrationless beyond belief, millions, the world over, hailed this startling advance in motor car performance as an engineering triumph.

Now McLaughlin-Buick for 1928 has followed with another great contribution to motoring comfort. McLaughlin-Buick has taken vibration out of the road by equipping every model with Hydraulic Shock Absorbers, front and rear—an added luxury that the savings of McLaughlin-Buick volume have been able to supply.

McLaughlin-Buick Hydraulic Shock Absorbers—made an integral part of the car by re-designing springs and chassis—provide far greater smoothness than Shock Absorbers which are added as "extra equipment". M-780C

VULCAN, ALBERTA

HAVE ANOTHER EAR

The first new corn on the cob is here. Never has a single poet lifted his voice in praise of this delicacy. What could he not make of "Those vaporous rows of aureat pearls, glowing beneath the golden tide of butter, keen with salt." Surely some other literature than that of breakfast-fool could wax rapturous over the sweet-heart of the corn, that marvellous, daisy whiteness, honey sweet, which at last yields itself up to strong, questing teeth. Sacred literature bears witness to the seductions of corn. When the timid Israelites cowering in the desert fastnesses of Sinai learned Canaan was "a land of corn and wine" they experienced a sudden change of heart and burst across the Jordan. Their depredations among the corn fields and wine jars of the Hittites, Hivites and Jebusites are reported to have been something scandalous. They knew what was good, did those hairy patriarchs. But whoever undertakes to tell the world of the joys of green corn-must leave a certain incompleteness in his description of the table scene. To those who limit themselves to six or eight ears at a sitting, there is something almost disgusting about those who do not desist till they have "eaten their length in corn." Their barbaric cries of pleasure, their gnashing, rending on-laught and the drip of warm oil from their elbows are quite too suggestive of scenes on the cannibal islands. But what if shameless barbarism does once a year surround our polite tables? Life is short and false teeth overtake the strongest. So butter your ears and be merry, for Golden Bantam does not grow in the fields of Elysium.

ENTERING HIGH SCHOOL

Thousands of young men and young women (they aren't boys and girls after they get out of the grades) are entering high school this year, and if they are the right kind of young people they will get the right kind of a thrill from this experience. Entering high school is a epochal event in the life of anyone who is blessed with the opportunity. Most students never get beyond the graduation period in the high schools. After that they either go to work or loaf or do a little of each. A great many young people who enter high school never graduate, and that is a very sad mistake for them to make, and a still graver mistake on the part of the parents, providing the latter deliberately give their consent to a child leaving high school without graduating, when it is not necessary. The first day in high school marks the beginning of an important event in the life of the young man or young woman who enjoys the privilege of acquiring this important education. There will come a time in the history of this country (and it is approaching rapidly nowadays), when a young person without a high school diploma is going to find things pretty hard in this life. For education is the stepping stone to success and independence and without it all is slavish labor and interminable discouragement. Those who entered upon high school life today are to be congratulated. They are marching over a royal road and paving their own life's highway so that progress will be smooth and sure.

UNSELFISH SERVICE

Many good folk are lamenting the passing of the era when men and women consecrated their lives to unselfish service, prepared themselves to become ministers, missionaries, teachers or country doctors that they might administer to the spiritual, mental and physical needs of humanity without thought of large worldly gain. People today are coming to the belief that the best way they can help others is to produce much that their profits shall be large and that they shall never become dependent upon society. The old idea of service is direct. The new service is indirect. Twenty years ago it was still thought that only ministers, doctors and teachers served humanity. Today every workman who carries his whole day's wage home is known to have earned that wage in service to society. Elbert Hubbard's version of the Golden Rule was, "Do unto others as though you were the others," but an even more up-to-date version is "Do yourself much good and no bad to others." Getting something for yourself is reprehensible only when it is gotten at the expense of another.

SILENCE AND SPEECH

Could you quit talking for two weeks? Of course you could if it were absolutely imperative, but you wouldn't want to do it. Yet, a strict silence regimen is a part of the method of correcting defective speech adopted by one clinic devoted to that purpose. Patients are barred from uttering a single sound for a fortnight, no matter how urgent the need for conversation, in order to give the vocal machinery a complete rest. In a recent test 12 high school girls and 30 boys were subjected to the treatment. The girls thought it would be impossible for one of the female sex to cease from conversation for two weeks, but they would try. Two girls failed under the strain. One felt that she just had to ask "Is my nose shiny?" and the other that she must borrow a powder puff and she asked for it. One boy ran away but the others stuck to silence for two weeks, mainly by keeping radio receivers glued to their ears. One might secure an intimation of what the experience would be by ceasing from talking for an hour when in the company of others. Were one forbidden to speak, possibly there would be nothing else one would want to do so much. It is a voluntary act but most of us carry it on almost involuntarily. We are so accustomed to talking that it is automatic, though were it less so much of the conversation might prove of greater value. In the cases of those of us not suffering from defective speech, periods of silence might prove highly beneficial. Thoughts might catch up with conversation.

THE PRINTING PRESS

The next time you pass The Advocate office, step inside and take a look at the printing press. It will be all the better if, with lightning-like swiftness, you see the printed sheets flashing by the hundreds at edition time. Then remember what you read here. Less than 400 years ago, when printing was new, Francis I, king of France, determined to suppress all new ideas, especially in religious controversy. It is true, Francis is known as the "Father of Letters," but that is a false honor. The king, angered that sudden death did not add to the gayety of the spectacle, decided to add a few little humorous twists of his own to the already long list of tortures. His machine first "dipped" the victim in a bed of fire, fifteen feet long, ten feet wide, then automatically hauled the human sacrifice back by manipulation of ropes, keeping it up till the sufferer was tortured to death. Francis, after attending a number of executions, pronounced his machine "superb and meritorious"—his exact words. But the thing to do was to abolish the source of all heretical ideas, whether political, religious or social, and naturally the next victim was the printing press. The proclamation to prohibit further printing of books within the kingdom, under pain of hanging or burning, concluded with the merry words, "Such is my royal pleasure." Presses were smashed, and printers parboiled in the flames. A few generations later, on came the French Revolution, and the people on their part repelled to King Francis' machine by one of their own, the guillotine, whose keen, shining blade chopped off many a head among the court crowd till France was turned into a slaughter house. That was the end of the attempts to deform the human mind by placing an iron band around brains and smashing the printing press. For Democracy is only another way of spelling the word Tolerance, and in turn toleration has to do with the growth of knowledge, through the medium of the "printed page, which is to say, the real symbol of Democracy is the printing press. In spite of stupid Francis, the press has been rumbling ever since, century after century, proclaiming new ideas to the world, Democracy to all. Step in and see the Advocate press play its part.

CANADIAN JUSTICE RESPECTED

There is a healthy respect in the United States for the fair and impartial manner in which persons charged with criminal offences are dealt with in the law courts of Canada. This is manifested from time to time in the large dailies of the greater cities of the republic to the south, a recent instance occurring following the apprehension of the alleged "Strangler" in Manitoba, in regard to which the Chicago Tribune has the following to say: "The man who assaulted and murdered at least a score of women in various cities through the United States during the past year is captured and lodged in the Winnipeg jail within one week after he committed his first crime in Canada. Was this an accident or does it show greater efficiency and energy on the part of the Canadian police? Now let us follow this case in the Canadian courts. Will the Strangler be brought to trial promptly? Probably within thirty days, no longer than sixty. How long will it take the Canadian to select a jury? One day, probably within an hour or two. Will there be sob stories in the papers? No, the trial is going to be held in Canada. If the evidence shows that the Strangler is guilty, will he be found guilty? Right. Any chance of his getting ninety-nine years in the insane asylum? None. This trial is going to be held in Canada, remember."

Hon. J. D. McLean, minister of justice was sworn in as premier of B.C. on Saturday last.

His People

Greatest Heart Picture of a Generation

A profoundly moving drama, a stirring, sympathetic revelation of the conflict and clash of the modern generation's ideas and the older generation's ideals—a singularly warm human document, tender and appealing... a photoplay of surpassing quality... an outstanding contribution to the picture that possesses beauty and power and the highest entertainment value.

The old, old story of the prodigal son with an entirely new twist that will give you a new slant on the bulwark of our country—the so-called common people. It's a story for everybody—everywhere—without propaganda—with no axe to grind—no message to put over except the wonderful, heartwarming message of deep family affection and home. A tender, throbbing, pulsing human document that will live forever.

WINNERS OF MEDALS

In the Diamond Jubilee History Competition in the public schools of Alberta, held recently, three grade eight pupils were successful in winning the silver medal and three bronze medals out of a possible five for the highest marks in the High River Inspectorate. The gold medal was won by Tom Allard of Edmonton. The winners were: Silver Medal—Kathleen Smith of High River. Bronze Medals—Winnifred Ballachee, Queen Rathbun, Garnet Sims of High River, and Melba Smith of Brant and Lola Arney of Arrowwood schools.

Petroleum Situation in Alberta

Article by Professor J. A. Allen, of the Alberta Geological Survey, University of Alberta.

The importance of the petroleum resources of Alberta is indicated by the following statistics on production and by the fact that Canada in 7½ days can use all the petroleum she produces in a year.

In 1926 world production was 1,200,000,000 bbls.

In 1926 U.S.A. production was 766,540,000 bbls. (63.5% of total production).

In 1926 Mexico (decreased 25%), 83,000,000 bbls.

In 1926 Canada 364,603 bbls.

In 1926 Alberta (60% of Canada) 217,088 bbls.

At the beginning of 1927 the prospects for extended petroleum development in Alberta are better than ever before. From data obtained from the 1926 drilling program it is a conservative statement to say that the chances of obtaining petroleum production in commercial quantities in several parts of Alberta are believed to be better than ever before, largely due to the fact that more is known about the occurrence of petroleum in the underlying formations, and optimism is evident.

In order to get an idea of the extent of territory with petroleum possibilities in Alberta it will be necessary to briefly survey a map of the whole Province. The Geological Map of Alberta, published by the Scientific and Industrial Research Council of Alberta in 1925, shows the general distribution of geological formations throughout the Province.

Alberta has an area of 255,000 square miles, an area twice as great as that of the British Isles. The Province of Alberta lies between 49° and 60° north latitude, so that its geographic position corresponds approximately to that of the British Isles, or between Rouens and the Shetland Islands.

In the north-east corner of Alberta there are approximately 15,000 square miles of Precambrian rocks. These rocks do not contain petroleum possibilities, but are important because various metals of gold, silver, nickel, copper, etc., may occur in these rocks similar to those minerals found in rocks of the same age in Northern Ontario and Quebec.

In the Canadian Rocky Mountains there are about 45,000 square miles in Alberta in which there are no petroleum possibilities. Deducting these two areas, there remain 200,000 square miles where the underlying rocks may be petroliferous. More than half of this territory is veneered with glacial debris so that the outcrops are very few. Since the search for oil is related to the geological structure, exploration in Alberta has been confined largely to regions where some geological detail is exposed.

Present knowledge of the geology of Alberta indicates that there are 80,000 square miles underlain by possible structure suitable for oil accumulations. This means that about 40% of the 200,000 square miles in Alberta is worth prospecting. Selecting from this area the most promising districts there are about 20,000 square miles where it is known that some of the geological conditions necessary for oil accumulation are present. The presence of oil in any of these structures can only be determined by drilling on the structures outlined by geological knowledge to the depth of possible oil horizons. The drilling that has been accomplished shows that there are several possible oil horizons, so that if the higher horizon does not contain oil there are known lower horizons in certain areas that are suitable as oil reservoirs.

There are 24 districts in Alberta where development has been centred, or where it is known that conditions suitable for oil retention occur.

Geological data of a detailed character are required in certain areas before it is possible to be certain that there is any particular structure in that district. Detailed geological information is also required to determine the areas where there is no chance of suitable structure and where the depth to possible oil horizons is too great to be reached by the drill.

There are few countries in the world where the geology is more difficult than it is in Alberta. There is due to the fact that the Cretaceous rocks were laid down along irregular shore lines, and those shore lines were constantly being changed during the growth of the Rocky Mountains.

The search for petroleum in Alberta dates to 1898, when the first well was drilled in the south-western corner of Alberta just north of Waterton Lakes within the front range of the Rocky Mountains. Here the Precambrian and Cambrian rocks are thrust over the much younger Cretaceous strata. A quantity of oil with 41 degrees Beaume was encountered. In some mysterious way the well was filled with various kinds of debris, including cable, and drilling ceased. The oil is still dripping from the rocks near the well site so that there is some accumulation at depth in this district.

After that date petroleum exploration can be divided into five periods: 1898-1913: No drilling for oil of importance was undertaken, although the gas fields at Medicine Hat and Bow Island in Southern Alberta, and gas field at Pelican Rapids on Athabasca River 200 miles north of Edmonton were proven by drilling. 1913-15: Drilling began again in 1913, and on May 14th, 1914, the Dingman well was "brought in" at a depth of 2,718 feet, on the north bank of

Sheep River, west of Okotoks, in what is now known as the Turner Valley field. The oil was almost pure gasoline with a gravity of 55 degrees Beaume. This "Discovery well" has been producing steadily since that date and is now known as Royaltite No. 1.

This discovery precipitated the oil boom that extended into 1915. About 600 development companies were formed, but only about a score ever started drilling, and half of these were in the Turner Valley district. By the end of 1915 drilling had practically ceased and none of the wells were drilled deep enough to thoroughly prove the possibilities.

1915-1919: Prospecting, but no marked enthusiasm.

1919-24: It was not until 1919 that a systematic search was made for geological structure suitable for oil accumulation. Drilling activity increased during this period and in October 1924, Royaltite well No. 4 in Turner Valley was "brought in" with a tremendous flow of gas at a depth of 3,740 feet. This well in 1925 produced approximately 160,000 barrels of naphtha with gravity 73 degrees Beaume, and about 18,000,000 cubic feet of gas per day. This well starts a new era in the petroleum history of Alberta. 1924 to date: Drilling activity increased steadily since Royaltite No. 4 was "brought in." In 1926 excitement reached a very high level and a boom was precipitated early in the year, even more exciting than the boom of 1914. After the excitement had reached the highest point and was on the wane, more serious consideration was given to real development. It may be said that the petroleum industry in Alberta has been definitely established during the past year, and that it has been placed on a sane and sound foundation.

In 1926 there were 87 wells being drilled or producing and upwards of 100 locations selected for wells. A fair percentage of these will be drilled on ultimately. The wells on the active list during the past year represent a total depth of 225,000 feet. This represents approximately 12 miles of drilling. In Turner Valley alone 35 wells represent 110,000 feet of drilling, or approximately 20 miles. Less than a dozen wells were completed last year.

One of these areas is the Athabasca bituminous sands deposits. This area includes the extensive deposits of bituminous sands which are exposed along the Clearwater and Athabasca rivers for a distance of nearly one hundred miles north of Fort McMurray. These are the largest known bituminous sand deposits in the world. Between ten and fifteen thousand square miles are underlain by these sands, which vary in thickness from a few feet up to over two hundred feet in thickness, with a bitumen content of twelve to twenty per cent.

Many attempts have been made to commercialize these vast deposits of bituminous sand, commonly known as "tar sands." Several schemes are now being tried out. One separation process has been completed by the Scientific and Industrial Research Council of Alberta at Edmonton. This separation process is now available to anyone who wishes to utilize this inexpensive method of separation.

In Turner Valley within the past month, three new wells have been "brought in" and the product is a crude oil. This is most promising for future development.

One of the most interesting discoveries of recent date was made by the Devonian Petroleum, Ltd., when the first well was "brought in" early in June, on a new structure at Skiff, south-east of Lethbridge. The estimated production of this well is about 200 barrels per day. This discovery indicates a large new field in Southern Alberta with promising possibilities. There are now fifteen wells in Alberta listed as producing oil, but most of the oil is coming from Turner Valley. The daily production from Royaltite No. 4 is about 600 barrels.

Very little drilling has yet been done in Alberta, and exceptionally promising results have been obtained from the wells that have been drilled to the possible oil horizons. Development in the way of drilling in Alberta has been scattered over too large a territory. More concentrated drilling will have to be carried out, before many of the areas that are now being prospected can be definitely classed as productive, or otherwise. Turner Valley is the only district where there has been much attempt at concentration in drilling, and even here we see that the results in wells comparatively close together are very different. This indicates how important it is to get all the data available on the underlying geological structure. There is, however, a reason for the earnest efforts in widely separate districts, and that is because geological information is still very incomplete. Some capital must be lost in the search for petroleum, but when money is invested in drilling it should be applied to drill in districts where there are some definite geological indications, at least where there is a chance of reaching the possible productive horizons.

It is true in Alberta, as in all countries with undeveloped resources, the venture must of a necessity be regarded as a gamble, but the chances are in favor of the investor, provided the capital is spent in drilling where the geological indications, determined in the light of the latest geological knowledge, are most favorable for the occurrence of oil at depth.

Vulcan Light & Power Company, Limited

Light and Power Rates in the Town of VULCAN

For Domestic Service:—

Available only for lighting, heating, cooking, domestic power and other uses in houses and apartments used exclusively for residential purposes.

A Service Charge of 70c per month.

The first 30 kilowatt hrs. per month, 10c per kilowatt hour.

Next 20 kilowatt hrs. per month, 10c for two kilowatt hours.

All over 50 K.W. Hrs. per month, per month 10c for three kilowatt hrs.

All over 200 K.W. Hrs. per month, 10c for 6 K.W. Hrs. provided Water Heater, not over 1 K.W. capacity and Stove are connected.

With a minimum charge including the service charge of \$2.00 gross, \$1.70 net, per month.

For Commercial Service:—

Available for all purposes where other rates do not apply.

A service charge of 70c per month for the first 500 watts of installed capacity and 20c per month for each additional 250 watts of installed capacity.

First 100 hours' use of installed capacity, 10c per kilowatt hour.

All over 100 hours' use of installed capacity per month, 10c for three kilowatt hours.

With a minimum charge including the service charge of \$2.00 gross, \$1.70 net, per month.

For Alternating Current Power Service:—

Available for motors, rectifiers and commercial heating apparatus such as tailors' irons, coffee urns, hot water heaters and stoves in commercial establishments, on yearly contract only.

Service charge \$1.00 per month, per kilovolt ampere (K.V.A.) of installation (one motor horsepower or 1 kilowatt in electrical heating apparatus to be considered equivalent to one K.V.A.)

First 100 kilowatt hours per month, per K.V.A. of installation, 10c for two kilowatt hours.

Next 100 kilowatt hours per month, per K.V.A. of installation, 10c for three kilowatt hours.

All over 200 kilowatt hours per month, per K.V.A. of installation, 10c for six kilowatt hours.

With a minimum charge including service charge of \$3.30 gross, \$3.00 net, per month.

DISCOUNT:—If paid within 10 days of date of bill, 10% on dollars of light and power accounts and not less than 30c, that is, all accounts to \$3.90 inclusive take a discount of 30c; accounts \$4.00 to \$4.90 inclusive, 40c; accounts \$5.00 to \$5.90 inclusive, 50c; etc.

CONSUMER'S DEPOSIT:—Twice the monthly minimum charge.

RECONNECTION CHARGE:—Twice the monthly minimum charge.

PRIZE FIGHT SLAG

(By Col. Hugh Clark)

Newspapers generally try to avoid the use of slang, but it is not discouraged in the sporting pages. Yet slang is not used as freely now as it used to be—even in reporting prize fights. The classic event in the prize ring was the Heenan-Sayers fight which took place in England in 1860. It lasted for over two hours and was a draw, the exhibition being interrupted by police. Thackeray wrote a poem on it and it was talked about for many years after—the fight, not the poem. A report published in an English newspaper at that time, which is preserved in "Pugilistica," a record of prize fighting in England during a century ending about 1870, contains the following gems: Heenan shook his head and grinned. Leaving his sign manual on Tom's frontpiece. Fell on the bridge of Tom's back. Tom countered on the proboscis. Tom's right pepper displays marks. Tom countered heavily on the cheek drawing claret. Heenan napped Tom a slashing crack closing his dexter goggle. Heenan got on top of Tom's sniffer. Got well off the bridge of Tom's snorter and knocked him off his pins. Heenan lodged his left on the nozzle. Tom got his left on the kisser drawing the carnific. Heenan alighted on Tom's oration trap and drew more of the ruby. Tom got a hot un on the whistler which shook his ivories and turned on a first nap. Heenan got on Tom's mouth drawing more of the juice, and followed suit on the snuffer tray. Heenan sent at little un at the scent bottle. Tom countered on the nose drawing the crimson. Heenan's mouth came in for pepper. An attempt with the right landed on Tom's nut. Heenan landed on the 'tato trap. Heenan retired to his corner and wetted his whistle. Tom landed on the nozzle, opening a fresh bin. Had exchanges on the mazzard—Toronto Star Weekly.

A SMILE OR TWO

Husband (seeing wife sewing on tiny garment): "Darling you don't mean—?" Wife: "Yes, dear, I'm making all my own clothes now."

Contributor: "My girl said this poem of mine made her heart miss a beat." Editor: "Rejected. We don't want anything that will interfere with our circulation."

Little Betty Jane (in the country for the first time): "Oh, Mama, look at the cute little green snake." Fond Mamma (ditto): "Put it down at once. It might be just as dangerous as a ripe one."

COUNCILLORS' ELIGIBILITY

(High River Times)

The question of the eligibility of certain residents of a town to sit on the Council thereof and at the same time have business dealings with the town, is the occasional question which comes up before many of the towns of Alberta which come under the operations of the Alberta Town Act. A ruling lately handed down by Frank T. Hayden, solicitor for the town of Drumheller, regarding the right of a business man there to sit on the council board, which right had been enlivened by a fellow councilman, is interesting in that the same question has been before the people of this community at different times. The ruling is in short: "In the first place I assume that Councillor Porritt is the proprietor of the Review and that The Review is not an incorporated company. Councillor Porritt is not disqualified for publishing advertisements of the Town at the usual rate. In connection with other work or service furnished by The Review to the Town for which The Review is paid by the Town, there is no disqualification if the work or service contracted for has been fully completed by both parties. If, however, there is an existing contract unperformed there is disqualification." The question is an important one, and has at times come up before the voters of High River, as to whether it was wrong for a business man of the town to do business with the Town while acting as one of its Councillors and some feeling have thereby been engendered against well meaning citizens, who have been serving their communities unaware that there was a question of their eligibility. In small towns it is frequently difficult to get representative men to act in this capacity and give up much of their time and thought to the details of a town's business, and to impose on such the penalty of also depriving them of doing business with the town, would, it seems, have a tendency to debar from office many like-ly candidates.

First Girl: "I've a good mind to chuck cocktails, stop smoking, wear longer skirts, grow my hair and stay at home to help mother." Second Girl: "Heaven only knows where this craze for originality will lead you."

Wife: "The tailor said he could not make the costume for less than \$75, so I told him to go ahead." Husband: "Why didn't you ask me first?" Wife: "I didn't want to waste five cents telephoning, dear."

Extra Mileage at No Extra Cost

Gum-Dipping is an exclusive Firestone process.

It insulates and impregnates every strand of every cord with rubber. Internal friction and heat are reduced to a minimum—the side walls are greatly strengthened. Firestone Full-Size Balloons absorb road irregularities—making driving easier and riding more comfortable.

Firestone Dealers are in a position to save you money and serve you better. See your nearest dealer to-day.

OIL FIELD NEWS

Great Activity Exists in the Turner
Valley Where Naptha and Crude
Oil is Being Piped to Refinery

Steps will be taken at once to con-
vert the Dalhousie No. 5 well into a
continuous flowing well instead of one
which flows by heads according to the
field manager of the Imperial Oil
Company. Mr. MacLeod, upon his re-
turn from the field on Friday gave
the information that a 2-inch tube
which would be run to the bottom of
the well which, since it has been deep-
ened slightly, is down 4,595 feet. The
placing of a 2-inch tube will decrease
the pressure needed to lift the oil in
the well and it will also render con-
trol of the flow much more easy. Since
the well was brought in it has been
flowing by heads and, immediately
following a drilling operation which
cleaned cavings out of the hole, blew
loose with such force that it tore out
of control breaking a huge 6-inch pipe
line from the well mouth to the stor-
age tanks. He declared that this in-
stallation might not increase the out-
put of the well to any appreciable ex-
tent, but that the main object was to
obtain a steadier flow under less pres-
sure.

Dalhousie No. 6 is drilling for 8 3/4-
inch casing at 4,030 feet and there are
now 700 feet of 10-inch open hole in
the well. The tools are operating in
the Fernie shales.

Dalhousie No. 1 using the diamond
drill was working in a hard limestone
formation at 4,115 feet on Saturday
morning.

Royalite No. 7 was making hole for
6 1/2-inch casing in a very hard forma-
tion at 3,820 feet on Saturday.
Royalite No. 8 the new well which
offsets McDougall-Segur No. 1 and
which was spudded in with standard
equipment is now operating at 410
feet making hole for 12 1/2-inch casing
with rotary equipment.

Equipment is being installed at
Royalite No. 9 which offsets Vulcan
No. 2, and preparations are going
steadily forward for spudding in.
Rotary equipment was installed at
the Millarville No. 1 well on Thurs-
day and in the first 20 hours of drill-
ing 100 feet of hole was made for
12 1/2-inch casing. The well was down
625 feet on Saturday and making
good progress.

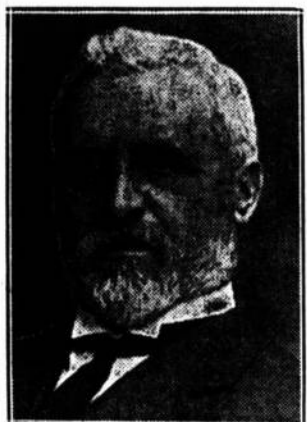

A very hard formation is being
pounded through at 2,830 at the High
wood No. 1 well where hole is being
made for 8 1/2-inch casing.

The 12 1/2-inch casing is being drawn
from the Jumping Pound well which
is being abandoned.

Three new buildings costing about
\$21,000 will be erected by the Imper-
ial Oil on the main corner of the road
in Turner Valley. The buildings will
consist of a bungalow office building,
40x64, and two residence bungalows,
38x48 feet.

Production figures of the Illinois-Al-
berta Oil Co., during the past week
shows that for the whole week, the
production per day amounted to 89.3
barrels of high grade naptha.

PREMIER JOHN OLIVER DEAD

Premier of British Columbia for
Eleven Years

B. C. PREMIER IS DEAD

The Hon. John Oliver, premier of
British Columbia, died at his home in
Victoria on August 17, the news be-
ing received with universal mourning
throughout the Dominion. The editor
of the Comox Argus has the follow-
ing to say of him: "His life has been
a triumph of native talent over ad-
verse circumstances. As a miner's
son in Derbyshire, England, he ex-
perienced what real poverty could
mean—grinding poverty. As a pion-
eer son in the Fraser Valley, he knew
what it was to be short of cash. He
was too busy helping his father to
earn a living and later to earn a liv-
ing for himself to obtain much educa-
tion, but he had an extraordinary re-
tentive memory and a striking per-
sonality. In appearance he was al-
ways the burly farmer and his speech
on and off the platform was always
blunt and very much to the point. No
one loved a tilt more than John Oli-
ver. He came into power in 1916
when the revolution against the Bows-
er government carried the Liberals in-
to power all over the province. By
the death of his leader, Mr. Brewster,
he was unexpectedly elevated to the
position of Premier of the province.
There is no doubt that he has shown
capacity for leadership in that po-
sition. For eleven years he has been
a tower of strength to the govern-
ment of which he was the head, and
his loss will be very keenly felt by
them."

SACCO AND VANZETTI

Nicola Sacco and Bartolomeo Van-
zett together with Maderios all paid
the penalty of their deaths on Mon-
day night the 22nd at about the hour
of midnight for their crime committed
about six years ago, after an almost
continuous legal battle during this
time to save their heads. The dis-
position of this case, terminating as
it did, will meet the approval of all
Americans who are desirous of seeing
this element of population deprived of
its self controlled ideas that it can
commit crimes and be freed by the
exercise of frenzied foreign demon-
strations of action and words.

IT REDUCES PRICES

Some people have always argued
that advertising adds to the cost of
goods, and that the business house
that eliminated this form of expence
could afford to sell cheaper. It is
interesting to think what would hap-
pen if all at once firms stopped ad-
vertising. The result would be that
the enterprising and successful store,
the one that gets a good trade because
it serves the public efficiently, would
be unable to hold its position. A store
of that kind could not show enterprise
in attracting the public, because the
public would not know what it was
doing. People would buy in a hap-
hazard way, largely of the stores that
happened to be nearest to them. If
the enterprising store attempted to
handle some big lot at low prices, the
public would not know that the goods
were there, and the sale would not be
a success. This would discourage a
man from special attempts to serve
the public, and he would run along in
a routine way. The tendency would
be for a lot of small stores to spring
up, and get the trade away from the
enterprising ones that now advertise
freely. The public would not know
that one store was better than an-
other, and a dealer could charge high
prices and the customers would not
have the store advertising by which
they could tell what prices should be.
Merchants would find that it did not
pay to hold special sales as the pub-
lic would not notice them much if
they were held. The constant stream
of trade that has been flowing through
enterprising stores would dwindle.
When a store sees its volume of trade
fall off, the charge per article for re-
tail distribution has to be increased.
The cost of distributing stuff could be
expected to double under such a sys-
tem, and there would be a lack of the
special opportunities by which the
thrifty buyer now saves money.

BROTHERS OF THE PEN

Referring to the presence of Brit-
ish newspapermen in Canada, the ed-
itor of the Quebec Chronicle-Tele-
graph, says: "Such visits can do
much to preserve the ties that connect
Canada with the mother country, al-
though paid without any deliberate
missionary purpose, and Canadians
are not only proud but anxious to
show what they have and what they
are doing to intelligent tourists; hav-
ing sufficient confidence in their na-
tional industry and resources to be-
lieve that favorable publicity, in some
form or other, must be the result.
The British newspapermen when they
return home can do much to keep
the cause of Empire, if they will en-
courage desirable British immigrants
to come out here and settle on the
land in as large numbers as possible."

H.R.H. the Prince of Wales is ex-
pected in Ottawa on August 31 and
will spend two days at Government
House as the guest of Their Excel-
lencies, Lord and Lady Willingdon.

Western Canada is in a better posi-
tion today than in years past, Sir
Henry Thornton, president of the
Canadian National Railways, is quot-
ed as saying in Winnipeg dispatches
to Wall Street: "I never saw such
flourishing conditions in Western
Canada. Fields are ripening evenly
and grain is well headed in almost
every part."

Intelligent and Conscientious Service

You want to do business with a firm that is experienced,
and conscientious enough to treat your auto kindly. Your
car is a valuable piece of machinery. Go to the "doctor"
whom you know will not undermine its parts. Your
motor, too, is a valuable piece of machinery—you want
it treated with the proper care to give you the most mile-
age and motor longevity. Our service is guaranteed.

USED CARS

Several Used Cars of different makes, are thoroughly
overhauled, affording a buying opportunity well worth
investigating.

OWNED BY FARMERS

Farmers put three million dollars of their own
money into this Company because they wanted
better service in handling their grain than they
could get without this Farmer's Company.

That is one reason for expecting satisfaction when
you deal with a U. G. G. Elevator. Experience
shows that you do get satisfactory service.
Deliver your grain to:

UNITED GRAIN GROWERS LTD

Elevators at Vulcan, Queenstown and Milo
Get U.G.G. Binder Twine at your Elevator.

The length of two horses was all
that stood between a small pot of
gold and the backers of Rionda, in the
third race at Hawthorne, recently.
The horse, virtually ignored in the
mutuels, galloped under the wire for
show money at a price of \$726.24 to
\$1 to win. Those who did back the
outsider collected \$52.98 on their \$2
for third money.

This novelty, says the Mail and
Empire, the practicability of which was
explained in Radio News for Febru-
ary, has appealed to overseas lovers
of the terpsichorean art. In a Birk-
hamstead (England) hotel 29 couples
danced recently to radio music un-
heard by the amazed spectators; each
tandem wore inconspicuous headphones
through which he or she heard the
phantom strains from the distant or-
chestra.

The phonograph is 50 years old.
And Edison is still inventing things.
He is the greatest of the world's prac-
tical scientists. He is one of the great
men of all time.

W. H. Sanders, who has been liv-
ing at Los Angeles, Calif., for several
years, with his family, returned to
High River last week and is now en-
gaged as manager of the U.G.G. ele-
vator at Azure. His family will re-
main in Los Angeles for a time ere
they return to Alberta.

According to a report of the Gaine
Guardian's Branch of the Department
of Agriculture, Alberta's fur sales in
1926 amounted to \$2,122,778, or an in-
crease of \$90,000 over the previous
year. The province now ranks third
in this regard. The Dominion total of
\$15,000,000 odd showed practically no
change from the year before.

ITEMS OF INTEREST

The thing that does most to encourage a taste for finer and better things is credit.

Humility isn't much of a virtue if you cultivate it because you are afraid to fight.

Over three hundred swimmers will compete for the \$50,000 in prizes offered at the Toronto Exhibition.

It is estimated that 30,000 Canadians visit Europe yearly. This is a form of tourist travel that has assumed large proportions only since the war.

Hon. Howard Ferguson, premier of Ontario, has announced definitely that he will not be a candidate for the leadership of the Conservative party in Canada.

Women's shoes, a manufacturer asserts, have increased two sizes in the last two generations. It's only a matter of another generation when a man won't even have a pair of socks as can call his own.

A holiday is a fine investment. It restores both body and mind and rejuvenates the soul. Worries and harassment fade under glowing suns; a complete change of environment and people rehabilitate mental process and bring about a juster estimate of problems, a saner sense of proportion.

The Chicago Herald and Examiner says that although J. Ogden Armour was rated as the world's second richest man, his estate at his death was estimated at \$20,000. He was a financial casualty of the war. By his own admission at the peak of his reverses he lost \$1,000,000 a day for 130 days.

Great Britain's noted Jurist, Rt. Hon. Sir Gordon Hewart, of Bury, Lord Chief Justice of England, spent a short time at Lake Louise and left Monday for Toronto to attend the Canadian Bar Association's annual man of deep human feelings. Even if he was over fond of his liquor, he offset the weakness to a great extent by the gifts he left for posterity to enjoy and enthrall.

Approximately 80,000 grain cars are being moved to Prairie points by two railways to handle the season's wheat crop. Scores of engines, some of them equipped with automatic stokers, designed to increase the speed of transit, are now on the western lines ready for the big effort.

The final shipment of 218 buffalo left the Wainwright Park recently, making a total of 1948 animals to be moved to their new northern home this season. Owing to the rapid increase in the number of buffalo in the park at Wainwright, shipments to the north in three years have totalled 5,585 head, and of this number only six failed to stand the long trip by rail and water to their new domain.

Canadian wheat serves Scottish taste in bread better than any other wheat in the world, according to Alexander McLeod, director of the Scottish Co-operative Wholesale Society, Glasgow, visiting in Winnipeg with two other members of the society. The visitors, who represent the largest buyers of Canadian wheat in Great Britain, spoke very highly of the Canadian system of inspection and sale of grain on the certificate.

A former Alberta newspaperman made the prediction in Montreal that, if frost held off until the crop was all harvested, the province of Alberta would break all records with 150,000,000 bushels of wheat this year. Mr. Groff has been in charge of the statistics of the Alberta department of agriculture for many years, and he knows pretty well what he is talking about. It would not be surprising if the 1923 record of 140,000,000 bushels were beaten.

Robert Burns has been maligned ever since death claimed him. He has been constantly held up as a victim of strong drink but medical authorities, who have probed back through the centuries, declare that rheumatic infection and not alcoholism caused the poet's death. No matter what caused his death, Burns has made a name by reason of his poetical contributions, that will live through the ages. And he did have a love for his fellow beings that proved him to be a The Edmonton Journal quite rightly disputes the Ottawa forecast of a wheat crop of 104,165,000 bushels for Alberta. According to Provincial Government figures Alberta produced 113,120,000 bushels last year and this year there is greater acreage and prospects of an unusually high yield. The Journal is not unreasonable in anticipating with favorable conditions a crop of 150,000,000 bushels. On the Lethbridge division of the C.P.R., an estimate has been made of a crop of over 28,000,000 bushels of wheat, a very great increase over a year ago.

With the thousands of grain cars already on its lines in the west augmented by 10,000 additional from eastern lines and with 70 of the largest engines in the country transferred to the Prairies to reinforce the hundreds already in service, the Canadian Pacific Railway is all ready to help move the wheat from the country elevator to the markets of the world. Thousands of box cars are distributed at strategic points; grain doors provided and arrangements completed for the necessary extra personnel. Every unit is in first class condition and ready for immediate service.

ITEMS OF INTEREST

The actual cost in dollars of the damage done by the recent Mississippi flood is placed at over \$400,000,000.

The difference is that a newspaper man makes the paper and a journalist gets the money.

There were great leaders in the old days because they had ideas to teach instead of cash to pay for elections.

The British India polo team defeated the picked Meadowbrook Point Judith team, 10 to 5.

Eight hundred harvesters left St. Johns for the prairie provinces to help in the harvest fields.

Betty: "Do you have any green lipstick?" Betty: "Yes. A railroad man is going to call on me to-night."

A man can be thankful he is born these days for with the decreasing birth rate the chances are that if he wasn't he wouldn't be.—Kitchener Record.

Miss Holmes, who taught at Claresholm last year, and Miss Laidlaw, who taught at Vulcan, have arranged with the respective school boards to exchange places for the coming year. Returning home by automobile from a tour of Oregon and Washington, the young son of Mr. W. S. Ryan of Champion fell out of the car as it was rounding a curve of the road and was instantly killed.

More people are killed by automobiles in Canada than by railroad trains. In 1926 there were 606 deaths by automobiles and 434 on railroads. There were 56 killed in street car accidents. Careless pedestrians and careless parents probably caused more automobile deaths than careless drivers.

The electrical storm of last Saturday evening, disconnected the wires of the Calgary Power Co., near Blackie and left this neighborhood in darkness for a while. The Electric Theatre, where a good crowd were in attendance, were in trouble, but the good natured audience held their seats and saw the play through before they left.

After millions had been spent on a harbour at Port Nelson as the terminus of the Hudson Bay Railway, it has been found that Fort Churchill is a much better port. Well, let us be glad that the discovery was made before it was too late to make the change. This is something that, at any rate, the West has to thank the critics of the route for.—Orillia Packet.

Horses for farm use are increasing in Western Canada. There were 2,442,268 in 1926 compared with only 377,654 in 1900. These do not include the even larger number of range-bred horses. There is a steady export sale of western horses including large numbers to Russia, including the heavy draft, riding and driving animals. Eastern Canada is also buying increasing numbers from the west.

Building of a repair shop for the High River Service Station of McKague and Mayes by the Highwood Motors Limited, was commenced Thursday morning. The building will be located at the rear of the Service Station with access from Sixth Street. The building will be of galvanized iron construction, 25x50 and will contain battery service, tire repair and general car service departments. Stark & Smith are the contractors.

William Stuart, spare forward and defence man for the Boston Bruins, will likely be traded to Minneapolis hockey team in exchange for Dutch Gainer, defence star, whom Lloyd Turner bought from the Calgary Tigers, along with Curly Headley, Ernie Anderson and Emory Sparrow.—Albertan. Dutch Gainer is a brother of Fred Gainer of High River and is well known here in baseball and hockey circles.

We were yesterday informed by a High River farmer and a reader of the Times, that he suffered a 100% loss of his barley, oats and wheat in the storm of Sunday, July 17th, but at the present time he was feeling quite optimistic regarding its possible come-back. His wheat, oats and barley have all again headed out and he states, that if frosts keep off for another three weeks he will reap a fair crop. The wheat heads are now short but the others are in normal conditions. The barley is well advanced but the wheat and oats are still quite green. This is known to be such a wonderful come-back crop that, we agree with him, he may yet get a fair crop.

KIRKCALDY NEWS

Miss Edith Boose returned home last week from an extended trip in B. C. and Banff.

In a primitive state the young left home early, but they didn't come back at 2 a.m.

Mr. Chauncey Tuttle of Kirkcaldy who has been on the teaching staff at Three Hills, Alberta, has returned to his home for the holidays.

Mr. and Mrs. H. E. Dunbar and family, Mr. and Mrs. Welton and family and Mrs. Hall and Kathleen Colwell have returned from a Banff trip where they spent the past week.

Miss Olive Dunbar spent the latter part of the week with Miss Maude Shaw, west of Vulcan.
